Solution-based casework is an approach to assessment, case planning, and case management that combines what we know from clinical social work with what we value about sound social work practice. It is grounded in family-centered social work and draws from clinical approaches within social work and mental health. By integrating problem- and solution-focused approaches that form the clinical and social work traditions, treatment partnerships are more easily formed between family, caseworker, and service provider. Solution-Based Casework is a skill-based, practice-oriented text that provides the specific guidance that students and new practitioners need in order to make sense quickly of the complex tasks of assessment and case planning in child welfare. The book flows out of a long practice experience, and was developed in consultation with workers and supervisors who were attempting to remedy problems viewed as contributing to recurrent abuse and neglect. It seeks to end adversarial relationships in casework and advocates case plans based on specific outcome skills rather than on those written with vague outcome goals measuring attendance in counseling. It serves as a common conceptual framework for integrating...
