

Revolvers (Paperback)

By Rick Sapp

Taj Books, United States, 2014. Paperback. Book Condition: New. 146 x 146 mm. Language: English . Brand New Book. Why shoot a revolver when a modern semiautomatic carries more rounds, reloads faster, is flatter and slimmer, and is no more costly? Revolvers are no-problem guns. Because it has a relatively straightforward design, a revolver is very reliable. A semiautomatic is sensitive to cartridges, and stories about jammed actions because of insufficiently powerful rounds are numerous. Revolvers do not jam. If a revolver misfires or a case is underpowered, the shooter simply pulls the trigger again. The complexity of a semi-auto's mechanics compared to a revolver gives the revolver an edge in durability. A revolver can take a great deal of punishment and still shoot a tight group. The final point in favor of revolvers is their ability to accept powerful loads. No semi-autos can withstand the power of loads such as .454 Casull or .475 Linebaugh. In short, revolvers still rock!.
